PRACTICAL NO: 8

AIM: shell scripting 2: condition :(for loop, until loop, while loop,) arithmetic operations

1. For loop

```
ubuntu@ubuntu:~$  cat>table1
for table in {2..20..2}
do echo "table of 2 :$table"
done
^C
ubuntu@ubuntu:~$ chmod 777 ./table1
ubuntu@ubuntu:~$ ./table1
table of 2 :2
table of 2 :4
table of 2 :6
table of 2 :8
table of 2 :10
table of 2 :12
table of 2 :14
table of 2 :16
table of 2 :18
table of 2 :20
```

2. For loop with user input

```
vboxuser@bilalfycs:~$ ./tabl1
print table
input number
2
2
4
6
8
10
```

3. Until loop

```
vboxuser@bilalfycs:~$ cat>untildone
i=1
sum=0
untill [ $i -gt 8 ]
do
echo $i
let sum=" $sum + $i "
let i=" $i +1"
done
echo "then sum is =$sum"
```

Output:

```
vboxuser@bilalfycs:~$ ./untildone
1
2
3
4
5
6
7
8
then sum is =36
```

4. Arithmetic operations

```
vboxuser@bilalfycs:~$ cat>casedemo.sh
echo "enter your number"
read a b
echo "select any one option"
echo "A. Addition"
echo "B. Subtraction"
echo "C. multiplication"
echo "D. division"
echo "E. exit"
echo "Echo your option"
read ch
case $ch in
A | a) c=' expr $a + $b'
echo Addition is $c ;;
B | b) c=' expr $a - $b'
echo Subtraction is $a \* $b'
C | c) c=' expr $a \* $b'
D |d) c=' expr $a /$b'
echo division is $c ;;
E |e) exit ;;
echo "sorry wrong option" ;;
esac
```

```
vboxuser@bilalfycs:~$ ./casedemo.sh
enter your number
20 5
select any one option
A. Addition
B. Subtraction
C. multiplication
D. division
E. exit
Echo your option
a
```
